

## **Technical Data Sheet**

### **Gravitrol SG-7000**

#### **Tin Strip Controller**

#### **Description**

The Gravitrol SG-7000 provides accurate, reliable control for nitric acid based tin and solder stripper processes. The Gravitrol SG-7000 continuously monitors process specific gravity and automatically adds fresh stripper solution when the specific gravity climbs above the user-defined set point. The Gravitrol SG-7000 also controls process level and will automatically transfer spent material to a drum or holding tank.

<b>Features</b>	<b>Benefits</b>
High quality process instrumentation	Accurate, reliable process control
Automatic delivery of replenishment chemicals from factory packaging or from working solution directly to the process	Minimizes chemical handling
Compact, wall mount design	Saves space and is easy to install

<b>System Requirements</b>
----------------------------

Electrical	120 VAC, 60Hz, 10 amps
Dimensions	18" X 24" X 10" (H X W X D)
